

# SUNDAY NIGHT MOVIE

June 10 – 6:30 pm

## A Plastic OCEAN: We need a wave of change.

This is a new feature-length adventure documentary that brings to light our global disposal lifestyle. Additional educational material on this topic is available from The United Church Observer (The Plastic Menace, copies will be available), National Geographic and the G7 Meeting this coming week.

In *A Plastic Ocean*, an international team of adventurers, researchers, and Ocean ambassadors go on a mission around the globe to discover what is beneath the surface of our seemingly pristine Ocean. They capture some fascinating new images of marine life, plastic pollution, and some scenes from places we have all seen on holidays but never expected to view from underneath the surface of the ocean. They introduce workable technology and policy solutions that if implemented in time, change things for the better.
